

Food Production Investment Program (FPIP) Experts

DC Energy is a strategic energy management company servicing food processing and heavy industrial facilities in California's Central Valley and beyond. Specializing in the implementation and validation of ROI-driven energy efficiency projects, DC Energy has secured more than \$17 million in FPIP grant funding for our clients, resulting in a projected annual greenhouse gas reduction of 14,881 MTCO₂e.

California Food Processors – You May Qualify for Up To \$8 Million in Project Funding

What is the Food Production Investment Program (FPIP)

FPIP is a California Energy Commission-operated grant funding program designed to help local food processors implement facility-improvements that reduce greenhouse gas emissions.

- Grants Cover Up to 85% of Eligible Costs for Qualified Projects
- Funding Ranges from \$100K to \$8MM Per Project
- Projects Reduce Energy Costs While Upgrading Critical Processing Infrastructure
- Funding Pays for Equipment, M&V and Engineering Design Costs

DC Energy Provides Full Service FPIP Project Implementation

- Project Development
- Grant Development
- Grant Management
- Measurement & Verification

We are California's Energy Management Experts with More than \$17 Million in FPIP Funding Awarded To-Date

Qualifying Projects:

- Compressor Controls and System Optimization
- Machine Drive Controls and Upgrades
- Advanced Motor and VFD Optimization
- Wastewater System Efficiency
- Process Equipment Insulation
- Refrigeration Optimization
- Drying equipment
- Boilers, Economizer Upgrades
- Steam Trap, Condensate Return and Heat Recovery Systems
- HVAC, Compressed Air and Boiler Control Upgrades
- Solar Thermal, Biogas, Microgrid and Fuel Switching

14,881 MTCO₂e

Projected Annual Greenhouse Gas Emissions Savings

461,679 therms

Projected Annual Natural Gas Savings

14,285,858 kWh

Projected Annual Electricity Savings

\$17 MM
